

Abstract submission guidelines for European and International Conferences 2012

Please note that you must register for the Regional Studies Association Conference in order to submit an abstract. The conference is inclusive, which means that all submitted abstracts will be accepted. The exception to this is if the abstract contains inappropriate content, or falls outside of the topical themes of the conference.

Only one abstract may be submitted per registration. If you would like to present more than one paper, then a second registration must be paid for. Alternatively, a co-author on that paper may register and present.

The submitting author will be considered as the leading and presenting author, unless otherwise stated. If the co-authors are not cited on the paper or when submitting the abstract, then their names will not appear in the conference volume.

The following guidelines set out the acceptable format for abstract submission. These guidelines apply for our European Conference in Delft, 13th-16th May 2012, Delft University of Technology, Netherlands and our International Conference in Beijing, 24th-27th June 2012, Beijing Conference Center, Beijing, China.

Please note that the abstract submission closing date is February 10th 2012.

Abstracts guidelines:

- Between 400-800 words in length;
- Titled
- Text only; no diagrams, graphs, pictures, citations or maps
- All contributing authors must be named, with their country and institution
- Indicate which gateway the paper is being submitted under

The Regional Studies Association reserves the right to reject abstracts that do not conform to the above criteria, or that fall out of the scope of relevant gateway themes. Please refer to the [call for papers](#) (Delft) or the [call for papers](#) (China), for relevant themes.
