

SMARTER 2018

2018 Conference on Smart Specialisation and Territorial Development: Implementation across global networks of regions, cities and firms

Seville, September 26-28, 2018

**Co-organised by the European Commission's Joint Research Centre
and the Regional Studies Association European Foundation (RSA Europe)**

Four years have now passed since smart specialisation officially entered European policy. This approach to territorial development through the promotion of smart, inclusive and sustainable growth represents a unique opportunity in contemporary policy for territorial development; for the first time, national and regional authorities across an area of more than five hundred million inhabitants are implementing a common set of policy principles and methodologies.

This conference offers a comprehensive picture of the smart specialisation policy experience, including an evaluation of its early results, and highlights recent developments both conceptually and empirically. Particular attention will be given to implementation challenges and ways to address them, as well as to methodologies for impact assessment. In addition, the conference will explore how smart specialisation engages with global value chains and production networks, and how firms, regions and cities can benefit from relationships across the borders.

The concept of smart specialisation has now expanded in geographical scope beyond just Europe. The theory and practice of smart specialisation is being constantly developed and it is enriched by these processes. These developments will be discussed.

We welcome contributions from all areas of regional analysis that carry analytical weight but also, which have operational applicability. The conference offers to a limited number of participants from academia, institutions and territorial authorities, a unique opportunity to discuss and define the scope and main avenues for future research and policy analysis, and to address the challenges confronting policy makers and practitioners. As well as academic submissions, abstracts by practitioners or co-authored by academics and practitioners are welcome. In addition, we welcome complete session proposals on a specific area/ issue including the list of 3-4 speakers and their abstracts.

Themes of interest to the conference may include:

- Smart specialisation from design to implementation: lessons, challenges, opportunities, experiences and early results
- Methods for monitoring and evaluation
- Territorial economic analysis in support of smart specialisation
- Smart specialisation, global value chains, and production networks
- Urban challenges and strategies for innovation and development
- Trans-regional and trans-national cooperation
- Models of regional and multi-level governance
- The Entrepreneurial Discovery Process and stakeholder involvement
- The actors of smart specialisation: research organisations, businesses, public actors, civil society groups
- Smart specialisation experiences worldwide

Delegate numbers for this free to attend conference are limited (travel & accommodation must be covered by the delegate).

Abstract proposals will be reviewed and selected by the Conference Programming Committee against the criteria of originality, interest and subject balance.

Only one author per selected abstract will be invited to attend this conference. Please do not book your travel and accommodation until you have received an invitation. Only invited delegates will be able to attend the conference.
